Head

Hygienic No-Touch, No-Probe Thermometer

Narrative

Instantly take a patient's temperature without ever touching the skin. The VeraTemp+ eliminates the need to stock and restock expensive temperature probe covers. A simple push of a button displays the temperature on the backlit LED screen.

Bulleted Copy

- Clinical infrared thermometer is 100% hygienic
- Takes body temperature instantly without skin contact
- No risk of cross contamination
- No need to wake or disturb patient to obtain temperature
- Eliminate expense associated with thermometers requiring probe covers
- FDA-approved and meets ASTM standards of accuracy

Feature Callout Copy

VeraTemp+ comes equipped with a “traffic light” color display system making it easy to read and diagnose a temperature in any light.
